

Hey, everyone 😊

Today we will be talking about the use of the words “there is” and “there are”. We talked about this in class, but we will recap, just to be sure.

Since this is grammar, I will use Slovenian to explain. 😊

Write this in your notebooks:

Uporaba izrazov “there is” in “there are”.

Kadar hočemo v angleščini povedati, da se nekaj nekje nahaja, uporabimo izraz “there is” ali “there are”. “There is” uporabimo za ednino in “there are” za množino. Pri vprašanjih samo zamenjamo vrstni red prvih dveh besed, torej “Is there...” in “are there...”

Na primer

V učilnici je računalnik. THERE IS a computer in the classroom.

V sobi je nekaj stolov. THERE ARE **some** chairs in the room.

V učilnici ni računalnika. THERE ISN'T a computer in the classroom.

V sobi ni nobenega stola. THERE AREN'T **any** chairs in the room.

Ali je v učilnici računalnik? IS THERE a computer in the classroom?

Ali je v sobi kakšen stol? ARE THERE **any** chairs in the room?

(Pazite na razliko med “some” in “any” v drugem stavku).

Exercise

1. Look around your room and write down two things that are there and two things that aren't there.

Poglej po sobi in napiši dve stvari, ki sta v sobi, in dve, ki jih ni.

I will give you an example for my room. (Tole je primer za mojo sobo)

There is a desk in my room.

There are two computers in my room.

There isn't a toilet in my room.

There aren't any elephants in my room. 😊

2. Write two questions for a friend. (Napiši še dve vprašanji za prijatelja)

For example:

Is there a bed in your room?

Are there any pencils in your room?

That's it for today, have a great day 😊
